

## **Mechanical tonometer Little Doctor AT LD-71 with a phonendoscope**

Tonometer mechanical Little Doctor AT LD-71 is a classic device for measuring blood pressure. The main advantage is an accurate aneroid manometer made of metal.

The cuff is made of nylon, so it is durable and comfortable. Thanks to the metal fixation ring, it will not move out of the hand. Suitable for arm circumference from 25 cm to 36 cm.

The kit includes a high-quality metal stethoscope. Your device is not in danger of being clogged with dust, since the check valve in the blower has a strainer. Adjustment of descent of pressure from a cuff very smooth. The air needle valve is metal, so it is very reliable and will last a long time.
